ABOUT US

Silicone & Technical Products (Pty) Ltd was started by Ivan and Beverley de Klerk in 1984 – Cape Town based entrepreneurs with a vision for perfection. In the ensuing 34 years the company has become a second-generation company with their son, Matthew, joining the business in 2014. Like other successful family owned manufacturing and hardware wholesale trading businesses in South Africa, the de Klerk’s attribute their success to the passion and dedication of the family as well as the employees who share in the business ethos effectively transforming it into a corporate sized company where voices are heard and success is shared and celebrated with all.

Since inception in 1984, S&TP acted as representatives for Dow Corning Silicones, GE Silicones, GE Bayer Silicones, and Momentive Performance Materials. In 2009 the decision to become an independent supplier of silicone and silicone related products to the South African market allowed them to leverage expertise, products and prices from primary and secondary overseas suppliers and because of this and their manufacturing expertise in the food approved silicone product space they are seen as a first in their class independent supplier, re-packer of sealants and adhesives as well as a producer of silicone and non-silicone related chemical products in Africa.

Four branded operating divisions comprising of SILTECH sealants and adhesives, BIOSIL silicone and non-silicone based chemicals, FCD foam control dispersants and Y-CLEAN cleaning chemicals offer exceptional solution related products to all who wish to use them.

Quality Management Systems audited by the SABS encompass: ISO9001:2015 Customer Service, FSSC22000 for food safety. All the food grade products are HACCP, Kosher, Halal approved and have FDA compliances. SABS SANS 1828 certification approved on Aqueous Degreasers, Concentrated All Purpose Cleaners and our Powdered Oxygenating Detergent Agents, which are specifically intended for use in the food industry. Y-Clean disinfectants are NRCS approved.

Silicone & Technical Products (Pty) Ltd operates out of Cape Town as head office as well as Johannesburg and Durban. The team comprises of around 80 staff members and is an equal opportunity company with codes of Conduct and Ethics as drivers.

The focused policies of providing excellent customer service, quality products as well as industry experience and expertise will dominate their landscape as they strive for innovation to be market leaders in the core areas in which they operate but continuing to build and invest in the team, the products and the processes that hold them together as a unit.
NEED IT SEALED?

OUR PRODUCTS GETS THE JOB DONE!

Our range of purposefully designed silicone, acrylic and PU joint sealants, crack fillers, superglues, polyurethane foams as well as cornice glues and silicone lubricants get the job done no matter what.

Designed to be perfect for cement-based building materials, brick, ceramic, marble, glass, wood, galvanised steel, aluminium and most plastic surfaces, our industrial or DIY silicone and polyurethane products comes in a variety of shore hardness and colours.
### Recommended Cleaning Procedures

1. **Surface Preparation for Sealant Adhesion**
   - Clean the substrate surface properly before the sealant is applied. This permits force to be applied to the surface to be cleaned.
   - Pour or pump the solvent onto the cloth.
   - Let the solvent sit on the surface to be cleaned.
   - Lightly rub the solvent into the surface.
   - Wipe off the surface with a clean, lint-free cloth.
   - If a water-based cleaning agent is used, let it dry before the sealant is applied.

2. **Commonly used solvents for cleaning substrates prior to wet sealing with silicone are:**
   - Acetone
   - Methyl Ethyl Ketone (MEK)
   - Toluene
   - Isopropyl Alcohol
   - Ethanol

SILTECH 9000
PAINTABLE ACRYLIC SEALANT 260ML

One component paintable water based sealant | Exhibit very good adhesion characteristics to most construction substrates. | Suitable for decorative finishing before painting and many other DIY applications.

APPLICATIONS INCLUDE:
- Baseboards
- Crack Filling
- Door Frames
- Window Frames
- Joint or gap requiring weather-tight seal

Non-corrosive
Non-slumping
Paintable

Also available in 280ML SILTECH 900
